

tinyxml2::MemPool

```
graph BT; A["tinyxml2::MemPoolT< ITEM_SIZE >"] --> B["tinyxml2::MemPool"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a box representing the base class, `tinyxml2::MemPoolT`, with a template parameter `< ITEM_SIZE >`. A blue arrow points upwards from this box to a box at the top representing the derived class, `tinyxml2::MemPool`.

tinyxml2::MemPoolT
< ITEM_SIZE >
